

While we bask in the sun here in NZ the wet season is drenching Congo with intensity. There are only two seasons for Congo; 6 months wet and 6 months dry. While most major conferences are held in the dry season the teaching teams continue during the wet season and this week a Lubumbashi wide women's conference is being taught. Isabel from the CDLA board, Cathy & Jeanne (other ladies trained by our teaching teams see attached photo) will be teaching the Church Leadership course over a one week programme. During the Christmas break a youth conference has been programmed the that will be followed by regional conferences at Bunkeya, Kikanda and Kipushi.

For these events to happen translators remain active in the translating of course material. Presently coursed are being translated into ChiBemba (by Samfya Bible school in Zambia), Chokwe and the new course that Geoff Paynter is adapting for our African context "Knowing God," into French.

Please continue to pray for Fidele recovering from eye surgery. See photo attached

Cholera continues to impact the Mulongo region and we are so grateful for our excellent medical teams who continue to respond to these serious events.

Blessings  
Murray & Joy
